Minister's Advisory Committee

The Minister's Advisory Committee heard briefs from the University of Alberta's Chancellor, Jean Forest; Dr. Joe Kandler, Chairman of the Task Force on Visiting International Students in Alberta; and Dr. Gerry Lock, Dean of Interdisciplinary Studies.

The Minister of Advanced Education and Manpower's Advisory Committee on University Affairs met on 11 June to hear presentations addressing a variety of concerns. Briefs were received from The University of Alberta's Chancellor, Jean Forest, on visiting international students in Alberta, and on children and others with learning disabilities; from the Alberta Association For Children With Learning Disabilities; and from the Task Force on Nursing Education In Alberta. Other position papers of concern to the University centred about Athabasca University, the use of retired professors as a knowledge resource, and the proposal to allow private colleges to grant bacca-

laureate degrees.

The newly appointed Minister of Advanced Education and Manpower, the Honourable Jim Horsman, expressed his needs to the Committee, and commented about several issues currently being reviewed by the Committee.

Of particular importance to the Minister was the *Report of the Task Force On Students' Contributions To The Costs of Post-Secondary Education*. The Minister felt that students should contribute a portion of their schooling costs, and he appeared to be in favor of differential fees. Mr. Horsman stated that although existing projects would be continued, the budget does not allow for any new undertakings

this year. In particular, the proposed buildings for the Faculties of Home Economics and Business Administration and Commerce, will have to be postponed until another budget year. At this time, the budget allows for an eight percent increase in spending over last year.

The Minister's Advisory Committee On University Affairs is not a decision-making organization. Rather, the members serve as eyes and ears for the Minister, gathering information, hearing briefs, then passing the compiled information on to him. The Committee meets six times yearly, and welcomes anyone who would like to present a brief on university affairs. □

Academic Staff Salary/Benefit Programs

The following has been received from Brian McDonald, Academic Administration. Listed below are the 1979-80 salary/benefit programs for regular, full-time academic staff.

The Board of Governors and the general membership of the AASUA have now ratified the salary/benefit settlement for 1979-80 as agreed upon by the negotiators for both sides. The settlement affects those staff members covered by one of the four Board-AASUA Agreements (faculty, A/P Officers, professional librarians and faculty service officers) and takes effect 1 July 1979. The four points of the ratified settlement are as follows:

1. (a) Salary scales for staff members governed by the four Board-AASUA Staff Agreements (faculty, administrative and professional officers, librarians and faculty service officers) will be adjusted upwards by 6.3% effective 1 July 1979. Salaries for all continuing staff will be adjusted accordingly.
(b) Merit increment values will be adjusted by the same percentage.
2. The Professional Expense Allowance maximum will continue to be equal to 1% of the salary floor for full professor and is therefore increased by 6.3%.
3. Other benefit programs (Alberta Health Care Insurance, Supplementary Health Care Insurance, Dental Insurance) will continue at present benefit levels, with the employer costs being adjusted as required.

4. Pursuant to the provisions of the Agreements, the number of merit increments will continue at current agreed-upon levels and will be paid to recipients effective 1 July 1979.

Under the terms of the settlement, the total compensation (salaries plus benefits) of the

average continuing staff member will be increased by 9.59% 1979-80/1978-79. This is broken down into 6.52% as adjustment and 3.06% as increment.

The 1979-80 salary and benefit program for regular full-time academic staff, inclusive of the settlement changes, is as follows:

A. Salary Scales

Category/Rank	Minimum Annual Salary \$	Maximum Annual Salary \$	Increments
1. Faculty			
Lecturer	15,412	19,696	6 @ \$ 714
Assistant Professor	19,696	25,575	7 @ \$ 840

Corrigenda

The following corrections apply to an article on St. Stephen's College Annual Convocation which appeared in the 14 June issue of Folio.

In the second paragraph, Alberta College South replaces the United Theological College. Also in that paragraph, the College's classes and administrative functions were moved in 1954

rather than in 1972. Furthermore, the old residence building is not occupied at this point in time but it is anticipated that it will be occupied by the two divisions of Alberta Culture as noted in the article.

In the third paragraph, the convocation address was given by Dr. Frank Brisbin, not by the Right Reverend George M. Tuttle.

In the final paragraph, the Reverend William W. Beach was Director of Continuing Education at St. Stephen's College from 1970 to 1976 rather than from 1910 to 1977. □

colloquy

I see that the Department of Psychology has once more engaged Physical Plant in its summer field work. It is hard to know whether it is the solar or the lunar cycle that brings us to this annual trial which has intensified almost beyond recognition since the advent of the earth-moving machine.

The casual and unsuspecting campus employee may actually miss the significance of the summer field works and I have occasionally overheard the innocents suggest that essential construction was underway. But a moment's reflection would dispel any such belief. We all know better.

Every scientist recognizes that any attempt to measure something influences the very measurement being undertaken, and this is precisely why Physical Plant's plans—ostensible plans, that is—cannot be revealed ahead of time. If we knew that a fence or a wall was to appear quite suddenly across our accustomed path we would react quite differently, less naturally, and ruin the observation. That wouldn't do.

I remember standing in Hampton Court quite recently and thinking how that famous maze was mere child's play compared with our own summer obstacle course. The Court maze has no barricades, no closed loops, and not even one unmarked hole. Besides, an attendant will climb a ladder to direct you safely out, whereas, our campus re-arrangements are more cunningly devised to help you stay in.

It is quite incredible how inconspicuous the psychology researchers are in all of this. Rarely do you catch a glimpse of a face behind a high window, and I can't recall ever seeing anyone with a clip-board; except, that is, two hard-hatted fellows disguised as labourers. This may be the perfect annual experiment on humans. But is it ethical? That's the question.
